The data in the Shipment Portal is updated by administrative stakeholders responsible for the management of the Inbound Sea and air Freight Shipments. The only exception is that Kuehne & Nagel (K&N) do not have access to the Shipment Portal. However, all inbound shipments, managed by K&N are also recorded in the portal. This is the responsibility of the Logistics Team.

Shipment predominately originate from the following ports:

- Yamaha Corporation Japan (YCJ)

- Shimizu – Japan
- Shanghai – China
- Port Klang – Malaysia
- Surabaya – Indonesia
- Semarang – Indonesia
- Jakarta - Indonesia
- Non Yamaha shipments
  - Korg/Vox – Vietnam & Japan
  - Paiste – Germany
  - Steinberg - Switzerland
  - Yamaha Corporation America – Savana, Gerogia
  - Belcat

For YCJ shipments YMA Logistics receives notification of shipments, generally, 2 weeks before arrival. The Shipment Portal enables all parties to have shared responsibility in the management of the Containers. This reduces/eliminates any time lags in data management due to the need to exchange and update data.

The Shipment Portal is a single platform that reports “real time” progress of all inbound shipments. The shipment portal offer a single platform to consolidate details of all inbound shipments from various sources. All the stakeholders then are able to access in inbound shipments from this single source, enabling more accurate decision making.

## Access to Shipment Portal

Stakeholders with administrative access:

Yamaha Music Australia

- Logistics Manager
- Asst Logistics Manager – Kurt Tietze
- Warehouse Supervisor – Johanna Scholes
- Logistics & Spare Parts Support – Matthew Madden

MOL Logistics

- Yvonne
- Customs (Common access)

#### TT Logistics

- Sam Senkurt
- Jon Campbell
- Maria Chiong (Leila)
- Yovi Sulastrie

All Yamaha stakeholders have access to the Shipment portal “**Inbound Container Movement**” Report via the Yamaha Intranet Web <http://172.29.64.7/divisions/logistics/>.

## Initial Data Entry

The Initial Data Entry of new shipments is completed by either MOL Logistics or at Yamaha

### MOL

MOL will generally input the majority of the Air Freight. As all Air Freight clearances are routed via MOL, they will receive the Arrival Notice and action the clearance documents. MOL has been provided access to Schopin. Schopin is the platform that YCJ utilises to make available all relevant shipment documentation. Again this removes MOL’s reliance on documents being supplied by the Logistics Team and expedites the Customs and AQIS clearance.

### Yamaha

YMA Logistics team is predominately responsible for update new Inbound Sea freight shipments into the web portal. YMA Logistics receives daily notification of sea freight via the Freight Transit Report in BASE (Yamaha ERP System). The designated logistics personnel generate a daily “Transit Report” to identify inbound (air & sea) shipments. This Report will be used to update the Shipment Portal with the details of the inbound shipments. Once the details of the Inbound Shipment has been recorded in the Portal, the relevant shipping documents are sourced from Schopin and placed in the relevant folders.

In conclusion, the shipment portal is intended to capture information of all inbound shipments from various sources. This information is then consolidated into the Shipment Portal. All the stakeholders then are able to access in inbound shipments from a single source.

## Data entry into Shipment Portal

 Add Shipment

New shipments are created using the

tab located in the top left hand corner of the Portal. This will open a new window titled “Add Shipment”.

The Add Shipment Portal has a number of mandatory fields. The Mandatory fields are:

- Container No. This can be sourced from the Bill of Lading
- Department
- Supplier Invoice No. All YCJ Invoices are AAA111, Korg/Vox Invoices are prefixed with YAI etc
- TEU
- Number of cartons
- Invoice No. This Invoice information is critical to maintain the data integrity between Shipment Portal and BASE (See xxxx below)

Refer to Figure 3, where the Mandatory fields are highlighted in yellow.

- Supplier Invoice No is empty.
- Department is empty.
- TEU is empty.
- No of Cartons is empty.
- Invoice 1 is empty.

OK

## Key Data

### 1. Dates

The other Key Data Field is the maintenance of Shipment Dates and their relationship with BASE.

Dates	
<b>0 - Shipment:</b>	
<input type="text" value="09/01/2013"/>	DD/MM/YYYY
<b>1 - Melb ETA:</b>	
<input type="text" value="22/01/2013"/>	DD/MM/YYYY
<b>2 - Container ETA:</b>	<b>2 - Container (Time):</b>
<input type="text" value="29/01/2013"/>	<input type="text"/>
<b>3 - Unpack ETA:</b>	
<input type="text" value="01/01/1900"/>	DD/MM/YYYY

The key date fields are:

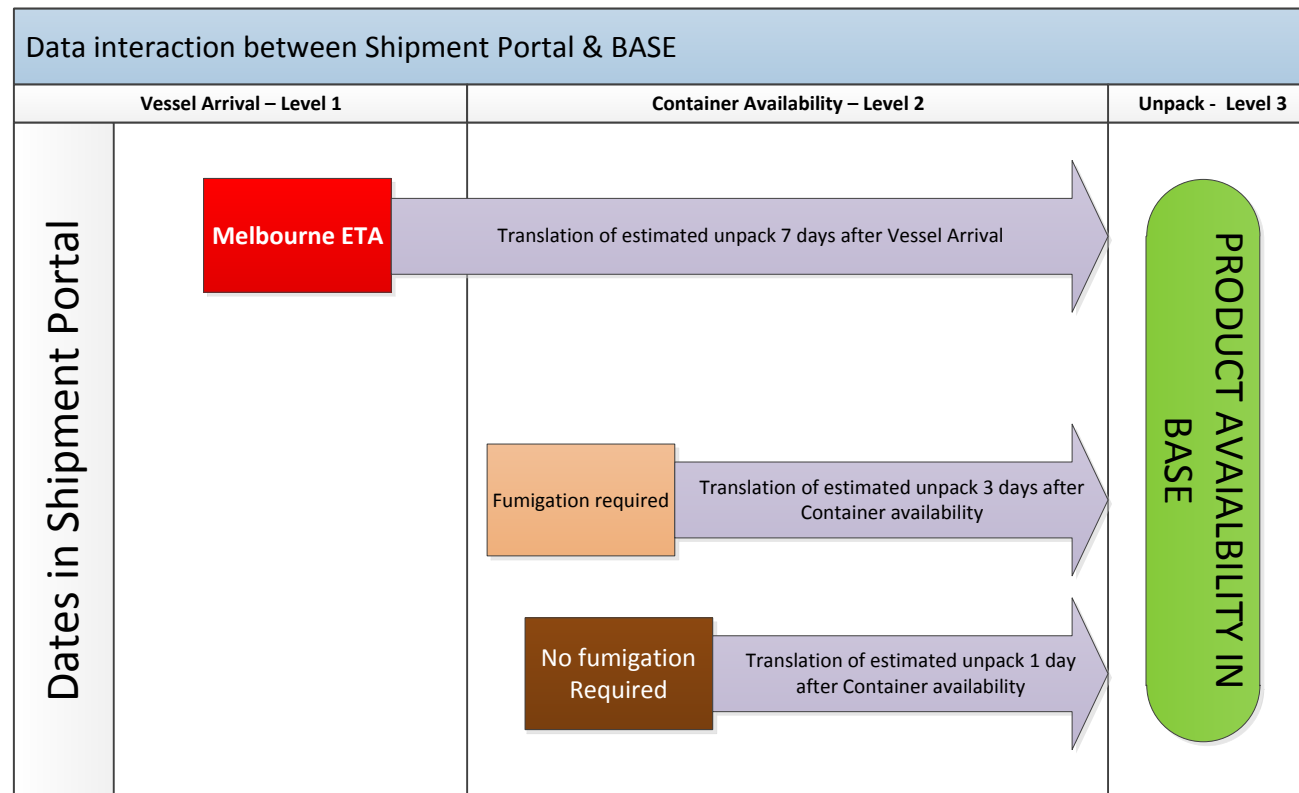

- 0 - Shipment Date - Date of shipment from Port of Origin. Date available on Bill of Lading
- 1 - Melb ETA - The ETA of the Ship arrival. This data is available from Port of Melb authority and YCJ invoices. When validating the ship arrival ETA, though has to be given if the consignment is being transhipped.
- 2 - Container ETA - This is the date of container availability at the wharf (Updated by TTL Container supervisor)
- 2 - Container (Time) - The time that the Container will be available for unpack at the warehouse door (Updated by TTL Container supervisor)
- 3 – Unpack ETA – The date that the Container will be unpacked at TT Logistics (Updated by TTL)

In order ensure that this information is maintained in BASE, the primary information portal of the Sales Team, the ETA data from the Shipment Portal updates BASE at 12noon and 8pm each day. This increased the accuracy of “Promise to Deliver” proposition of the Sales Team, which can obtain this information from BASE when looking at the product in BASE.

The Product Availability in BASE is calculated on the following formulas:

- 7 days from the arrival of shipment
- 3 days from Container arrival – if subject to fumigation
- 1 day from Container arrival – if NOT subject to fumigation

Refer Figure below.

Throughout BASE, the Arrival Date together with the Level Status is indicated. See Figure below

```

2 Containers on this invoice

Subject to Fumigation

Container Availability on 31 January

One of the products on the shipment is CLP470PE. Given the above details, the ETA on the Container unpacks is:

*Container Arrival (31 January, 2013) + Fumigation (Add 3 days) = Stock availability in BASE (3 February, 2013)*

The Figure XXX indicates that the item will be available to be shipped on the 3 February, 2012 and that given that given the Container is at availability Status, Base indicates that it as at Level 2. ("L 2").

### Progress of Container Clearance

The progress of the Container Processing can be monitored via the Portal. The completion of:

- Customs Clearance;
- Fumigation
- Availability of EDO
- Availability of all Shipment Documents (Invoice, Pack Dec, BOL, Man Dec etc)
- FTA docs

is available in the Shipment Portal.

Custom	Fumigation	EDO	EFT	Docs	FTA
✗	✓	✗	35298	✓	-
✓	✓	✓	35280	✓	-
✓	✓	✓	35287	✓	✓
✓	✓	✓	35287	✓	✓
✗	-	✗		✓	-
✓	✓	✓	35239	✓	-

The FTA documentation follows 4 steps:

- Certificate of Origin is available
- Refund Application lodged
- Import Declaration lodged
- Refund received

The sequence below will be displayed on the portal.

**FTA - 4** NEW

☒

C
**Certificate of Origin** - Wednesday, 16 January 2013 at 10:12:26

☒

R
**Refund Application** - Thursday, 24 January 2013 at 11:04:53

☒

I
**Import Declaration** - Thursday, 24 January 2013 at 11:04:55

☒

✓
**Refund** - Thursday, 24 January 2013 at 11:04:58

In the Example below, the shipment AEF001-002 indicates:

- It is yet to receive Customs Clearance;
- It is subject to fumigation
- EDO's have not issued
- Shipment documents are complete and available
- There is no FTA documentation.
